University of Ouagadougou Seminar

The IPA Francophone West Africa team organized a seminar at the University of Ouagadougou. Some 40 attendants actively participated to the meeting and speakers were challenged with interesting questions. Research Associate Alassane Koulibaly moderated the seminar with great professionalism. Senior Research Associate Estelle Plat presented preliminary results from the Sorghum Tech Adoption study, Country Director Nicolás Tomaselli presented results from the Agricultural Lending study in Mali and Adrien Pawlik discussed baseline data collected for the Ouaga Sanitation experiment. Attendees were mostly NGO practitioners, international officers and student and researchers from the University of Ouagadougou.

Address

University of Ouagadougou
