Vision 2030: Improving Reading Achievement in Kenya

The Vision 2030 Delivery Secretariat and Innovations for Poverty Action organized a Policy Forum focusing on research dissemination on improving learning achievements in Kenya. The forum was organized within the framework of the Ministry of Education, Science and Technology strategies to organically inform policy and decision makers with research findings.

The focus of the Policy Forum was: What is the evidence on literacy and learning achievements in Kenya? What is the role that small-scale research projects can play to shape and further inform the government strategy? How can research help answer policy relevant questions? The research dissemination event helped answer these questions by bringing together policy makers, implementing partners, and several researchers to present and discuss their recent research findings in the field of early literacy in Kenya.
