# Taxation and Formalization: From Evidence to Policy Making

This webinar showcased six research studies, carried out in coordination in Brazil, Colombia, the Democratic Republic of the Congo, India, Malawi, and Nigeria, that assessed the role of information about the process of tax formalization—including costs and benefits—along with assistance and/or subsidies to reduce the cost to citizens. The event highlighted the integrated results from the studies along with actionable insights and policy recommendations. The research presented is part of [EGAP's Metaketa Initiative](#), a coordinated research model designed to foster innovation and cumulative learning through simultaneous replication of research across multiple contexts.

**Ana De La O**, Associate Professor of Political Science at Yale University and the EGAP Taxation Metaketa committee chair, presented the results from the six studies. **Juan Sebastian Robledo Botero**, Director of Innovation and Private Sector Development at Colombia's National Planning Department (DNP), discussed policy implications in Colombia. **Shana Warren**, Research Scientist on IPA's Path-to-Scale Research Team, moderated a discussion and Q&A following the presentations.

## Panelists

- **Ana De La O**, Associate Professor of Political Science, Yale University and Chair, EGAP Taxation Metaketa committee
- **Juan Sebastian Robledo Botero**, Director of Innovation and Private Sector Development, Colombia's National Planning Department (DNP)
- **Shana Warren (Moderator)**, Research Scientist, Path-to-Scale Research, Innovations for Poverty Action
