Webinar Series: Violence and Crime in Latin America and the Caribbean

If you would like to receive updates via email on future webinars in this series, sign up for the series mailing list [here](#).

When it comes to combating crime and homicide in Latin America and the Caribbean (LAC)—home to 41 of the 50 most dangerous cities in the world—policymakers have few tested tools at their disposal. Although evidence is scarce, recent efforts to produce rigorous research is helping to broaden our understanding of what works in reducing violence and crime in the region.

The Becker Friedman Institute (BFI) at the University of Chicago, Princeton University, and Innovations for Poverty Action are pleased to announce a webinar series on violence and crime in Latin America and the Caribbean. This series of monthly webinars aims to shed light on novel innovative research on violence and crime in the LAC region and its policy implications.

All webinars are open to the public and all are encouraged to attend; recordings will be available approximately 1-3 business days after each event. For more information on each webinar and registration, please visit the individual webinar pages below.
